

Nandita Kamdar is a Director in the Engineering & Property Services (E&PS) Group at Johnson & Johnson in New Brunswick, NJ. She joined Johnson & Johnson in 2012. Currently, she is responsible for managing capital projects in their Pharm, MD&D and Consumer Divisions in the Americas. Prior to joining Johnson & Johnson, she was Vice President at PS&S, an architectural/engineering firm, where she ran the mechanical and electrical engineering groups. She was at PS&S for over 16 years where she was primarily responsible for managing major pharmaceutical design projects. She started her career as a project engineer at Schering-Plough where she managed small projects for 2 years.

She has over 20 years of experience as a business leader highly skilled at effectively managing projects and engaging high-performing teams to successfully advance corporate goals. She consistently delivers quality service to internal and external stakeholders, develops new services, improves existing services and identify new business opportunities. She has specialized experience in manufacturing and research-related capital projects that are readily transferable to processes in product, customer, and supply chain management. She is described by colleagues on confidential leadership assessments as a highly organized, respected senior executive with impressive technical and communication capabilities. She is also committed to positive collaboration across the enterprise.

Nandita is a licensed professional engineer, a LEED Accredited Professional and a Certified Energy Manager (CEM). She has a BS in chemical engineering from Columbia University and an MBA from Rutgers University.
