

6 Appendix 2 – Common EDI Data Elements

This appendix lists common EDI data elements. For further information see Section 4.3.

Data Element	Description	Data Type	EDI-214 Map
Carrier Code	Unique Identifier for the carrier.	VC(4)	B1003
Tracking Number	Key value for this shipment	VC(30)	B1001
Carrier Shipment ID	Carrier's assigned shipment number	VC(30)	B1002
Transaction Set ID	Transaction Set Identifier for this message	VC(3)	ST01
Control Number	Transaction Set Control Number – Unique identifier for the carrier status communication	VC(10)	ST02
Origination Address	Complete address of the ship from (shipper) location (usually depot)	Complex Data Type	N1, N2, N3, N4 where N101 = "SH"
Destination Address	Complete address of the ship to (consignee) location (depot or site)	Complex Data Type	N1, N2, N3, N4 where N101 = "CN"
Shipped Date		Datetime	G62 where G6202=11
Delivered Date		Datetime	G62 where G6202=?
Estimated Delivery Date		Datetime	G62 where G6202=17
Event Code	Status code for this update (this EDI 214 message)	VC(4)	AT701
Status Description	Full description of the status, for instance "AF" maps to "Departed Pickup Location with Shipment"	VC(200)	Lookup via DISA per AT701
Event Reason Code	Additional reason code for some statuses	VC(4)	AT702
Event Date	Date/Time of status update/event	Datetime	AT705 + AT706 + AT707
Event Location	Geographic location (city, state/province, country) of status update/event	Complex Data Type	MS1
Remarks	Free Form Remarks	VC(200)	
Delivered to Carrier Code		VC(4)	
Signed By	Person who signed for the delivery	VC(30)	L1101 when L1102 = "8N"
Weight	Gross weight of the shipment	INTEGER	AT803
Number of Pieces	How many physical packages comprise the full shipment	INTEGER	AT804
